

ĐORĐE ŽIVANOVIĆ

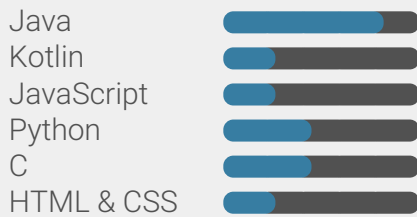

COMPUTER SCIENCE STUDENT

Profile

I am a highly motivated and open-minded young man that really wants to know as much as one possibly can. My starting point is software development, but I do not plan to finish there. I want to understand economics and finance, marketing, accounting... but also I want to travel and get to know other cultures, hear new music, see new landscapes, drive cars I have never seen before. The list is long, and my journey has just started. I actively played basketball during my education, but now it is a hobby, along side reading. Thanks to the internet, I am actively expanding my knowledge in various fields and occasionally I occupy myself with reselling items online.

Experience

Trainee in Digital Team

IKEA | Feb 2021 - Present

My role, as a part of Digital Team in IKEA South East Europe, is to provide IT support both on and off site, deal with asset management, system administration, etc.

Data Collection & Labeling Associate

Microsoft | Aug 2020 - Oct 2020

My role was to collect and label big amounts of data, that is later used by ML/AI algorithms for developing new features for Microsoft Office.

English Second Language Teacher

iTutorGroup | Oct 2019 - Feb 2020

My role was to teach English language to children in Asia.

Team Member

AIESEC | Apr 2017 - Oct 2017

As a member of Global Entrepreneur team my role was to interview foreigners for internship positions in Belgrade and find and communicate with companies interested in accepting them.
