

Djordje Zivanovic

Software Engineer

I am a dedicated and adaptable professional driven by passion for continuous learning and growth. With a keen interest in software engineering and architecture, I am committed to staying updated on the latest technologies and best practices. Beyond my professional pursuits, I maintain a healthy balance by enjoying hobbies such as basketball and reading.

Education

2017 - 2024

Computer Science

Faculty of Computing (RAF)

Skills

- Backend Development
- Cloud
- Version Control
- Agile
- Independent
- Proactive

Languages

Serbian - Native

English - Advanced

German - Beginner

Volunteering

Mensa

AIESEC

Experience

Dec 2023 - Present | Talentwunder

Software Developer

- After 2 years in corporations joined a small and dynamic team as a second backend developer along side a senior colleague
- Immediately had the opportunity to make an impact in an unfamiliar tech stack
- Hopped in at the end of development of referrals app and added new functionalities for email sending and other refactors as needed
- Rewrote an important part of the app and switched from event sourcing to classic relational databases which made a huge impact on the app's performance and stability
- Tech stack: Nest.js, CQRS, Kotlin, Micronaut, Postgres, Docker, AWS, KeyCloak

Oct 2022 - Dec 2023 | Engineering Group

Solutions Development Specialist

- Started my role as a Solutions Developer, working on an existing report generating service, adding new features and fixing bugs based on user requests
- Spent some time in parallel decoupling legacy codebase and writing tests
- Promoted to Specialist role in October while working on a new project for viewing lab scans, utilizing a small python service for deep zoom images and creating SpringBoot backend for viewing, editing, adding annotations and notes
- Tech stack: SpringBoot, Maven, SVN, Oracle DB, Jenkins, Jira, Confluence

Nov 2021 - Oct 2022 | Raiffeisen Bank

Junior Software Developer

- Developed middleware APIs between core and externally specified APIs from HQ
- Created a library on top of FeignClient to simplify use of external APIs
- Led the backend development of an internal app from idea to production
- Designed and developed multiple APIs needed by an inherited solution from Credit Agricole after merger
- Tech stack: Java, SpringBoot, JPA, Hibernate, GitLab, OpenShift, Angular

Feb 2021 - Jul 2021 | Ikea

Digital Team Trainee

- Provided IT support both on-site and remote
- Dealt with asset management, equipment, user onboarding and setup, network and system management

Aug 2020 - Oct 2020 | Microsoft

Data Collection & Labelling Associate

- Collected and labelled large amount of documents that are later used to train ML/AI algorithms for developing new Word features
